His Excellency, Christopher T. Sununu

REQUESTED ACTION

Authorize the Department of Environmental Services to award a Local Source Water Protection grant to the Manchester Water Works (VC #170435 B002) in the amount of \$8,600 to complete a project to protect public drinking water, effective upon Governor and Council approval through May 31, 2019. 100% Federal Funds.

Funding is available as follows:

03-44-44-441018-4718-072-500574

Dept. Environmental Services, DWSRF Administration, Grants- Federal

FY2018
\$8,600

EXPLANATION

The Department of Environmental Services issued a request for proposals for 2018 Local Source Water Protection Grants. These grants are funded by set-asides under the Drinking Water State Revolving Loan Fund. Twelve proposals were received. The proposals were evaluated and ranked based on criteria included in the request for proposals, such as whether the project fulfills a component of a source water protection program, that the proposed project addresses appropriate threats, and that the project will deliver a valuable and useful product. Based on the available federal funding and eligibility criteria, the Department determined that it could offer grants to seven source protection planning projects and three source security projects. See attachment A for the full list of grants awarded and list of reviewers.

The Manchester Water Works will use New Hampshire Department of Environmental Services (NHDES) grant funds to help protect Lake Massabesic, the drinking water supply for the City of Manchester and surrounding communities, by improving their efforts to identify, map and manage aquatic vegetative growth within the lake. Growth of native and invasive aquatic plant species can degrade water quality, alter basin capacity and the affect the drinking water treatment process.

This agreement has been approved as to form, substance, and execution by the Office of the Attorney General. In the event that federal funds no longer become available, General funds will not be requested to support this program. This grant award, while less than \$25,000 threshold, requires G&C approval as the City of Manchester has already received funds in excess of the threshold for this fiscal year.

We respectfully request your approval.

EXHIBIT A
SCOPE OF WORK

Manchester Water Works (MWW):

The City of Manchester will use New Hampshire Department of Environmental Services (NHDES) grant funds to help protect Lake Massabesic, the drinking water supply for the City of Manchester and surrounding communities, by improving their efforts to identify, map and manage aquatic vegetative growth within the lake. Growth of native and invasive aquatic plant species can degrade water quality, alter basin capacity and affect the drinking water treatment process. Early identification of native and invasive species will prevent infestations that may degrade water quality and create harmful water treatment disinfection byproducts. Specifically, the City of Manchester will do the following:

Task 1. Complete an Aquatic Vegetation Survey Within Lake Massabesic

- i. A certified lake-manager will conduct a field survey of aquatic (native and invasive) vegetation in Lake Massabesic. Aquatic vegetation will be sampled from a boat and plant species will be identified both by visual inspection and by using an aquatic vegetation grappling hook to sample submerged vegetation. All aquatic plant species identified within the lake will be recorded on a tally sheet showing common name, and the genus and species of the plant. A photo of each plant species will be provided as part of a monitoring report. Monitoring and data collection will be completed following quality assurance methods and procedures within a Site Specific Project Plan (SSPP) having the necessary technical detail consistent with the NHDES' New Hampshire Department of Environmental Services Exotic Species Program Quality Assurance Project Plan (QAPP). A draft SSPP will be provided to NHDES for review and approval prior to field sampling activities.

Deliverables: A final SSPP, results of the field survey will be prepared, including: (1) species identification, (2) bio-volume estimates, and (3) an estimate of aerial macrophyte coverage throughout the Lake, (4) established fixed monitoring stations within the lake and mapped using a GPS unit with a positional accuracy not to exceed three meters, (5) aquatic species photographs. The survey will map vegetation within the littoral/photoc zones and any other location(s) and document the dominance of any invasive plants observed including variable milfoil (*Myriophyllum heterophyllum*) and fanwort (*Cabombacaroliniana*), as well as any other state-listed invasive aquatic plants identified as part of the survey. Draft deliverables will be provided to NHDES prior to completion for review and comment.

Task 2. Report and Management Recommendations

- i. Review current baseline of invasive plant species collected previously and compare that information to the survey results of the Task 1 aquatic vegetation survey.
- ii. Review current management techniques in relation to the aquatic survey information to determine the effectiveness of the existing program and whether additional measures are warranted.

Grantee Initials 

Date 3/9/15

- iii. Develop an aquatic vegetation monitoring report documenting past control efforts and surveys, findings from the most recent survey, and any associated plant management recommendations. Recommendations will be reviewed and updated taking into account the findings from the aquatic survey completed in Task 1. Recommendations will identify areas in the lake for specific plant management techniques (e.g., zones where hydro-raking of white water lily is recommended), protocols for rapid response if new areas of invasive species occur in the future.

Deliverable:A final report that includes an updated field inventory and mapping of Lake Massabesic’s aquatic plant community as described in Task 1 conforming to NHDES quality assurance requirements and an updated aquatic vegetation management recommendations. Draft deliverables will be provided to NHDES prior to completion for review and comment.

Quarterly progress report forms must be completed by grant recipients or their subcontractor and submitted to NHDES every three months, beginning with the first full 3 month quarter after grant approval from Governor & Council.

EXHIBIT B
BUDGET & PAYMENT METHOD

All services shall be performed to the satisfaction of the Department of Environmental Services before payment is made. All payments shall be made upon receipt and approval of stated outputs and upon receipt of the associated invoice. **If the invoice is less than the initial estimate, only the amount on the invoice will be paid.** Payments shall be made in accordance with the following schedule, based upon completion of specific tasks:

Task Number/Description	Source Water Protection Grant
Task 1: Aquatic Vegetation Survey	\$3,400
Task 2: Report and Management Recommendations	\$5,200
TOTAL	\$8,600

EXHIBIT C
SPECIAL PROVISIONS

Subparagraph 1.7 of the General Provisions shall not apply to this Agreement.

Changes to the Scope of Work or reallocation of grant funds require NHDES approval in advance. Work must be completed by the completion date listed on the grant agreement (section 1.6). Requests for payment along with required proof of work must be submitted no later than 90 days after the completion date or the grant will be closed out and funds will no longer be available.

If a deadline extension is requested, the grantee must make that request for approval at least two months before the completion date. Failure to do so may result in lower rankings of future grant applications. Federal Funds paid under this agreement are from a Grant to the State from the U.S. Environmental Protection Agency, Drinking Water State Revolving Fund Set-Asides under CFDA #66.468. All applicable requirements, regulations, provisions, terms and conditions of this Federal Grant are hereby adopted in full force and effect to the relationship between this Department and the grantee.
