His Excellency, Governor Christopher T. Sununu  
and the Honorable Council  
State House  
Concord, New Hampshire 03301

**REQUESTED ACTION**

Authorize the New Hampshire Department of Environmental Services (DES) to award an Aquatic Resource Mitigation (ARM) Fund grant to the Southeast Land Trust of New Hampshire (hereinafter "SELT") of Exeter, NH (Vendor Code #155425) in the amount of \$85,000 for the purpose of acquiring land owned by Daniel Horsburgh and Elizabeth Mari in Fremont, effective upon G&C approval through August 31, 2018. 100% Aquatic Resource Mitigation Funds.

Funding is available in the account as follows:

	<u>FY'18</u>

Dept. Environmental Services, In-Lieu Wetland Mitigation, Grants – Non - Federal

**EXPLANATION**

New Hampshire RSA 482-A:3 requires a wetland permit for any proposed project that involves dredging or filling of a wetland. Before a wetland permit is issued, applicants must show that the proposed project will avoid adverse impacts to wetlands and will minimize and provide compensation for those wetland impacts which are unavoidable.

The DES wetlands program adopted a set of mitigation rules that establish what is necessary for an applicant to provide for wetland compensation. The current department rules spell out ratios for wetland compensation that include creating a new wetland, restoring a former wetland site, or protecting a high-quality aquatic resource by preserving adjacent upland habitat. The newest improvement, begun in 2006, to the mitigation options is commonly referred to as an *in-lieu fee program*. This mitigation option is ideal for projects that have difficulty in locating an appropriate mitigation site. The Aquatic Resource Mitigation Fund (ARM) authorizes the collection of mitigation funds in lieu of other forms of wetland mitigation as part of a Wetlands Permit Application.

The Department issued the request for proposals for ARM Funds available in the Salmon Falls – Piscataqua River watershed in April, 2016. The SELT application was received and on November 28, 2016, DES announced the decision to fund the SELT project in the Salmon Falls – Piscataqua River watershed. The project proposed by the SELT was recommended for funding by the ARM Fund Site Selection Committee. Attachment A lists the proposals received and Committee members involved in the decision. The review of the awards by the Army Corps of Engineers (hereinafter "Corps") and the New Hampshire Wetland Council resulted in full support of the recommendations.

The SELT project involves the acquisition of approximately 343 acres in Fremont including 4,107 linear feet of Brown Brook which is a tributary to the Piscassic River. The property also includes several streams that flow into Brown Brook and 3,135 linear feet of an unnamed tributary to the Exeter River. The subject Property includes nearly 71.5-acres of high value wetlands, including portions of 5 Prime Wetlands, and 29 probable vernal pools. In addition, the Property is within a "High Priority" site for Blanding's turtles identified in the "Conservation Plan for Blanding's Turtle and Associated Species of Conservation Need in the Northeastern United States". Attachment B includes a map of the two properties.

In the event that other funds no longer become available, general funds will not be requested to support this program. This agreement has been approved as to form, content, and execution by the Attorney General's Office.

We respectfully request your approval.

---

Robert R. Scott, Commissioner
