Dept. Environmental Services, In-Lieu Wetland Mitigation, Grants – Non - Federal

EXPLANATION

New Hampshire RSA 482-A:3 requires a wetland permit for any proposed project that involves dredging or filling of a wetland. Before a wetland permit is issued, applicants must show that the proposed project will avoid adverse impacts to wetlands and will minimize and provide compensation for those wetland impacts which are unavoidable.

The DES wetlands program adopted a set of mitigation rules that establish what is necessary for an applicant to provide for wetland compensation. The current department rules spell out ratios for wetland compensation that include creating a new wetland, restoring a former wetland site, or protecting a high-quality aquatic resource by preserving adjacent upland habitat. The newest improvement, begun in 2006, to the mitigation options is commonly referred to as an *in-lieu fee program*. This mitigation option is ideal for projects that have difficulty in locating an appropriate mitigation site. The Aquatic Resource Mitigation Fund (ARM) authorizes the collection of mitigation funds in lieu of other forms of wetland mitigation as part of a Wetlands Permit Application.

The Department issued the request for proposals for ARM Funds available in the Lower Connecticut River watershed in April, 2018. The Conservancy application was received and on November 28, 2018, DES announced the decision to fund the Conservancy project in the Lower Connecticut River watershed. The project proposed by the Conservancy was recommended for funding by the ARM Fund Site Selection Committee. Attachment A lists the proposals received and Committee members involved in the decision. The review of the awards by the Army Corps of Engineers and the New Hampshire Wetland Council resulted in full support of the recommendations.

His Excellency, Governor Christopher T. Sununu
and the Honorable Council

The Conservancy will use the funds to purchase the Bearce property. The property contains many high-quality aquatic resources that include 61 acres of wetlands, 139 acres of upland, approximately 9,241 feet of streams, and one confirmed vernal pool. The project will protect 55 acres of Wildlife Action Plan, Tier 3 habitat designated as supporting landscape. The property abuts the Monadnock Conservancy's 77-acre Mountain Brook Reservoir and lies within a 1,521-acre forested block, creating significant connections to conserved/undeveloped lands. Attachment B includes a map of the property.

In the event that other funds no longer become available, general funds will not be requested to support this program. This agreement has been approved as to form, content, and execution by the Attorney General's Office.

We respectfully request your approval.

Robert R. Scott, Commissioner

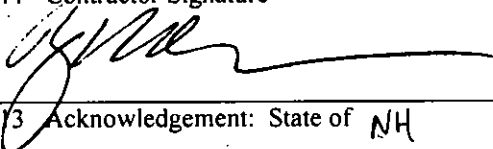

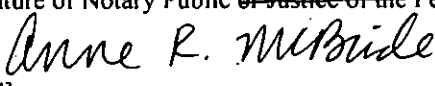

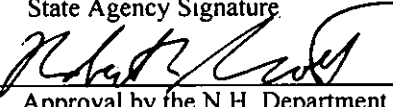

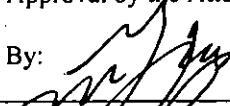

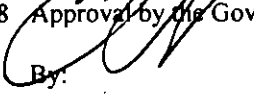

Notice: This agreement and all of its attachments shall become public upon submission to Governor and Executive Council for approval. Any information that is private, confidential or proprietary must be clearly identified to the agency and agreed to in writing prior to signing the contract.
