THE STATE OF NEW HAMPSHIRE
DEPARTMENT OF TRANSPORTATION

Victoria F. Sheehan
Commissioner

William Cass, P.E.
Assistant Commissioner

His Excellency, Governor Christopher T. Sununu
and the Honorable Council
State House
Concord, New Hampshire 03301

Bureau of Construction
September 9, 2020

REQUESTED ACTION

1. Authorize the Department of Transportation to enter into a contract with L & D Safety Marking Corp. (Vendor 260129) of Barre, VT, on the basis of a low bid of \$949,750.00 for safety improvements within the I-93 corridor extending from the MA/NH State line in Salem to the I-293 interchange in Manchester, from the date of Governor and Council approval through September 3, 2021, unless extended by the Department in accordance with the Standard Specifications. 100% Federal Funds.

Funding is available in State Fiscal Year 2021, and is contingent upon the availability and continued appropriation of funds in Fiscal Year 2022 as follows, with the ability to adjust encumbrances through the Budget Office between State Fiscal Years if needed and justified:

Funding is available as follows:	<u>FY 2021</u>	<u>FY 2022</u>
04-96-96-963515-3054		
Consolidated Federal Aid		
400-500870 Highway Contract Payments	\$752,494.20	\$197,255.80

2. Further authorize that a contingency in the amount of \$28,492.50 be approved for payment of latent conditions, which may appear during the construction of the project. The contingency requested is 3% of the contract amount.

Funding is available as follows:	<u>FY 2022</u>
04-96-96-963515-3054	
Consolidated Federal Aid	
400-500870 Highway Contract Payments	\$28,492.50

EXPLANATION

This project is part of the State's Ten Year Transportation Improvement Plan under the Highway Safety Improvement Program (HSIP). This is a safety improvement project and will construct durable pavement markings (durable polyurea) within the I-93 corridor extending from the MA/NH State Line in Salem, NH to I-293 interchange in Manchester, NH, providing improved visibility and durability. The project will also construct milled rumble strips in certain locations within the work zone, addressing gap areas resulting from previously constructed contract phasing and overlap areas, which did not include the installations.

The project will improve safety by installing durable polyurea pavement markings for the entire length of the I-93 corridor from Salem to Manchester. These markings provide improved visibility in nighttime and wet conditions. These markings will also reduce the number of annual pavement striping efforts that are typically necessary by the NHDOT Bureau of Traffic to maintain the markings on this facility, thereby reducing the temporary impacts to traffic and improving general public safety. The milled rumble strips will reduce run off the road crashes and improve safety.

The proposed contingency amount is 3% of the contract amount. This is to account for the economic instability with respect to fuel prices, potential fuel adjustments need to be considered.

The Contractor has been prequalified by this Department. The Contract has been approved by the Attorney General as to form and execution, and the Department has certified that the necessary funds are available and the bid reasonably conforms to the engineer's estimate in accordance with State procedure. Copies of the fully executed contract are on file at the Secretary of State's Office and the Department of Administrative Service's Office, and subsequent to Governor and Council approval will be on file at the Department of Transportation.

This project funding is: 90% (HSIP Funds) with anticipated utilization of Turnpike Toll Credits for the State's 10% match, effectively using 100% Federal Funds.

A copy of the Tabulation of Bids received for this project is attached along with the Contract Supplemental Sheet and a map indicating the location of the project.

Your approval of this resolution is respectfully requested.

Sincerely,

Victoria F. Sheehan
Commissioner

VFS/pcj

Department Estimate: \$1,079,750.00

Contract Amount: \$ 949,750.00

Under Estimate: \$ 130,000.00

SUPPLEMENTAL PROJECT INFORMATION SHEET

DESCRIPTION: This safety improvement project will construct durable pavement markings (durable polyurea) within the I-93 corridor extending from the MA/NH State Line in Salem, NH to I-293 interchange in Manchester, NH, providing improved visibility and durability. The project will also construct milled rumble strips in certain locations within the work zone, addressing gap areas resulting from previously constructed contract phasing and overlap areas, which did not include the installations.

FEDERAL FUNDING: 90% (HSIP Funds) with anticipated Turnpike Toll Credits for the State's 10% match.

CONTINGENCY: The proposed contingency amount is 3% of the contract amount. As a result of economic instability with respect to fuel prices, potential fuel adjustments need to be considered.

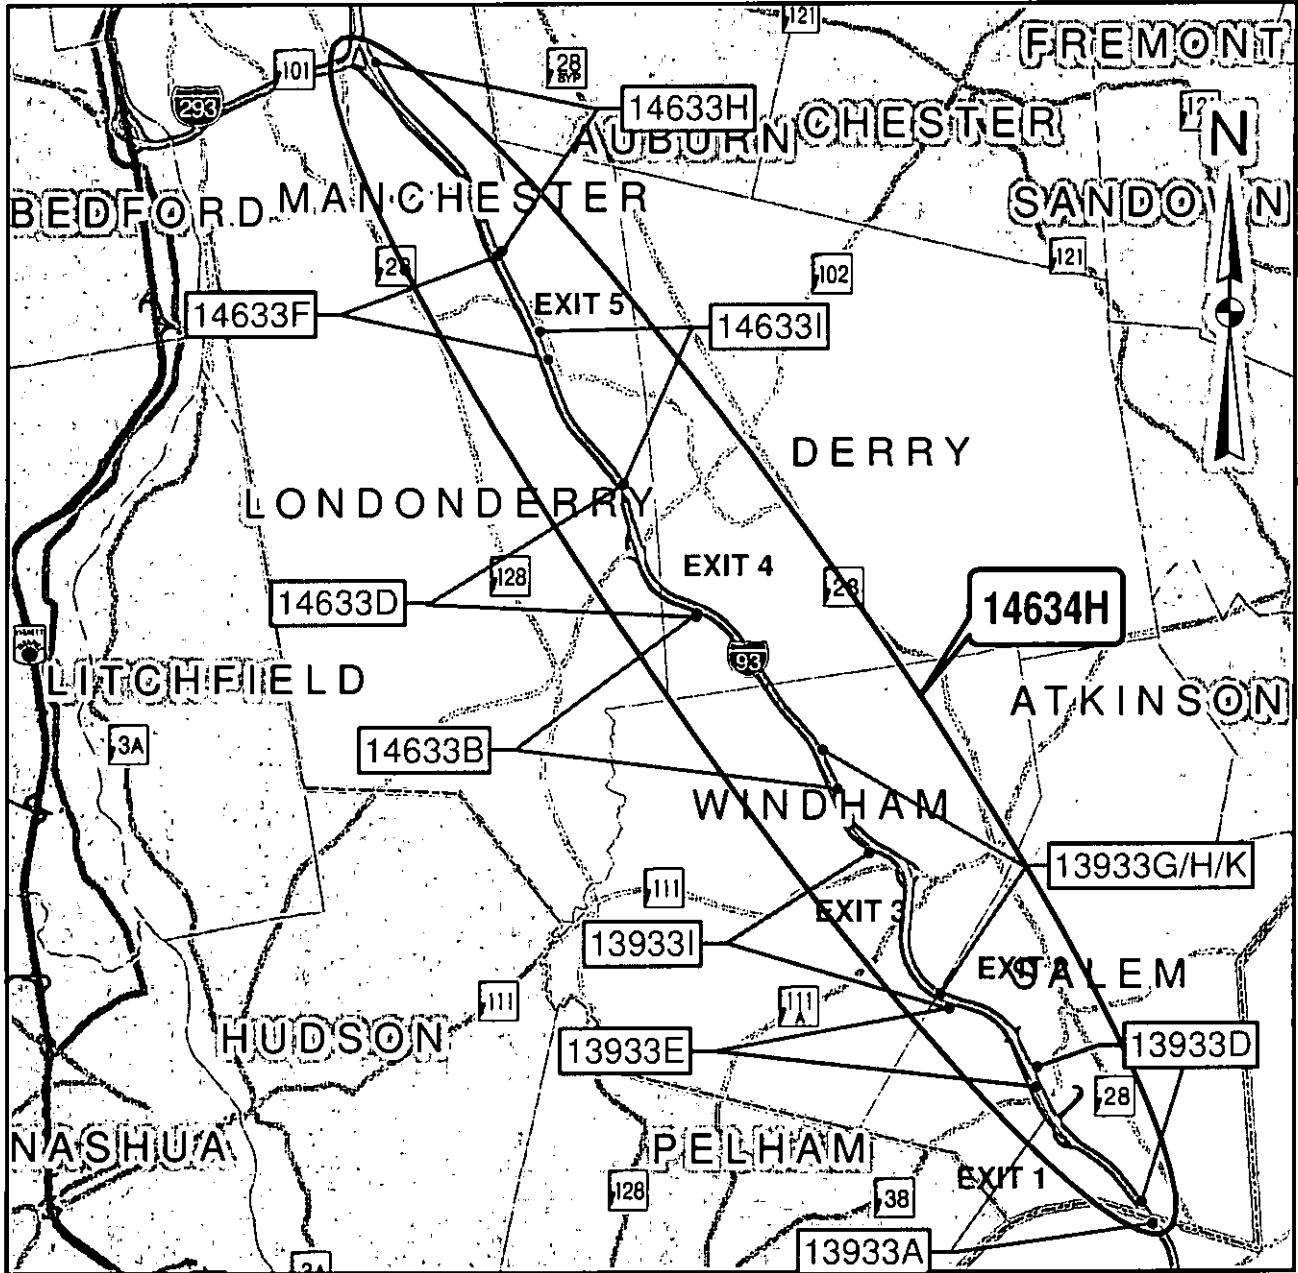

PROJECT INITIATED: This project was initiated through the Highway Safety Improvement Program (HSIP).

PROJECT EXPLANATION: The project will improve safety by installing durable polyurea pavement markings for the entire length of the I-93 corridor from Salem to Manchester. These markings provide improved visibility in nighttime and wet conditions. These markings will also reduce the number of annual pavement striping efforts that are typically necessary by the NHDOT Bureau of Traffic to maintain the markings on this facility, thereby reducing the temporary impacts to traffic and improving general public safety. The milled rumble strips will reduce run off the road crashes and improve safety.

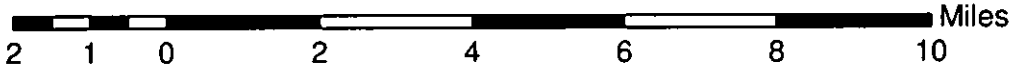

TRAFFIC IMPLICATION: The work limits will include permanent signing, supplemented by operational work area signing and portable changeable message signs. Lane closures will be allowed on I-93, utilizing mobile construction operation elements, including Truck Mounted Impact Attenuators, Arrow Boards, Uniformed Officers with Vehicle, as approved, and as specified in the TCP. The Contractor will be required to submit a weekly work plan for approval. The plan will detail the upcoming week's specific work elements, traffic implications, and traffic management measures. Traffic will be returned to the existing 4-lane configuration at the end of each work day. The center lane work will be required to be completed at night.
