REQUESTED ACTION

Authorize Department of Environmental Services (DES) to enter into **Sole Source** contract amendments with the following four vendors by increasing each contract amount by \$250,000 from \$690,000 to \$940,000, for environmental spill response, cleanup and tank removals at petroleum sites, effective upon Governor and Council (G&C) approval through June 30, 2017. 100% MTBE Settlement Funds. The contracts were originally approved by G&C on July 10, 2013, Item #76.

Dept. Environmental Services, MTBE Settlement Funds, Contracts for Program Services

EXPLANATION

The purpose of the requested action is to amend existing response contracts to add funding from the MtBE Settlement Funds. This will make it possible to conduct emergency services (removal of drums, containers and tanks with MtBE containing gasoline that are leaking or pose a release

threat) as well as remediate gasoline spills or gasoline contaminated groundwater. The contracts were originally approved by G&C on July 10, 2013, Item #76. These amendments are considered to be **sole source** because the contract amendment amounts are greater than 10% of the original contracts. DES maintains contracts with response firms for conducting oil spill response and cleanup activities to protect public health and the environment. When a responsible party can be identified, the statutes authorize recovery of costs incurred by the State. These contracts typically run for a multi-year period and the availability of the contracts ensure DES preparedness for emergencies, spill response, site cleanups and the identification and mitigation of new threats. DES is seeking to modify these existing contracts because the MtBE Settlement funding did not exist at the time that the contracts were authorized and the implementation of the MtBE Fund work is time critical. A sole source amendment of the existing contracts is the only possible way to complete the authorized work within the biennium due to the length of time required to procure response contractor services. The existing contracts include the four largest response firms operating within the State of New Hampshire and their capabilities and experience closely match the needs of the new program. The types of services that will be required by the new bureau are consistent with the ones already provided under these existing contracts.

The amendments have been approved by the Department of Justice as to form, content, and execution. In the event the Fund is no longer available, General Funds will not be requested to support these contracts.

We respectfully request your approval.

EXPLANATION

The Oil Pollution Control Fund under RSA 146-A, Hazardous Waste Cleanup Fund under RSA 147-B, and Gasoline Remediation and Elimination of Ethers Fund under RSA 146-G were established for environmental spill response and cleanup. The DES maintains contracts under these

The DES maintains contracts under these funds for conducting various oil spill response and cleanup activities to protect public health and the environment, often performed on an emergency basis. When a responsible party can be identified, the statutes authorize recovery of costs incurred by the State. These contracts are periodically renewed in consideration of preparedness for emergencies, changes in response and cleanup needs, identification of new threats, and economic conditions.

The DES will employ four initial response contractors to maintain adequate first responder capability and ensure coverage in all geographic regions of the state. Each contractor is required to respond when requested within a specific time, thus all four firms have an office and shop in New Hampshire. Remuneration under each contract for each year may vary depending on the type of work assigned. However, there will be a maximum expenditure as noted above for any one contractor and maximum aggregate expenditures of \$2,760,000 over the four-year contract period.

On October 2, 2012, the Department issued a Request for Qualifications (RFQ). Six (6) firms submitted qualifications packages and all contractors met the submission requirements. The DES Selection Committee evaluated each contractor's qualifications and experience, and scored the qualifications submissions. The rankings indicated that Clean Harbors Environmental, Inc., Bow, ENPRO Services Inc., Pembroke, TMC Environmental Services, Portsmouth, and Cyn Environmental Services, Dover, were the highest scoring firms. It was decided that four contractors would be awarded contracts with DES based on successful negotiation of a price schedule and performance standards.

See Attachments A and B for ranking of the six firms, evaluation scores, DES Selection Committee members, and funding allocation per contractor.

The contractors were pre-qualified to perform cleanup and emergency response work in accordance with standard practice for remediation services on a job-order basis. Contractors will be assigned work based on location, experience, and capabilities. The DES will evaluate the degree to which the contractors meet project needs based on responsiveness, proximity to an event, capability, and past performance.

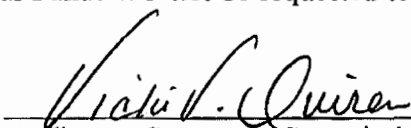

Unit prices in the Price Schedule, Exhibit B-1 are established for the initial year of the contract period based on an evaluation of fair market value, economic factors, and contractor input, and unit prices will be reviewed annually for consistency with fair market value, current rates, and economic conditions. The Department may revise the contract price schedule, as warranted, with notice to each contractor. However, the total value of each contract and the aggregate expenditure for the four-year period will not increase due to price schedule updates.

The DES has a long history of response and cleanup management experience, and program personnel are qualified to oversee all components of the contractor's work. DES has awarded term contract remediation services with the four firms in the past, and is confident that all contractors will perform in a professional and expedient manner under the current contracts.

The contracts were approved by the Department of Justice as to form, content, and execution. In the event the Funds are no longer available, General Funds will not be requested to support these contracts.

We respectfully request your approval.

(2) DES shall determine whether to pay the purchase price or the use/rental cost for an item used on any assignment

(3) Since IR Service providers have experienced increased motor fuel costs and have not used the DES worksheet for calculating the cost differential, DES has applied a one-time adjustment to the rates for trucks and heavy equipment by a 5.7 % incremental cost factor for company-owned equipment.

(4) Assumes that any large quantity of soil will be disposed as bulk wastes, 5 drums or less is considered small quantity since 5 drums cost \$490 versus a minimum load 10 tons at \$42 per ton plus administrative costs.

(5) The new Boat Technician hourly rate will also be applied to IR Service personnel that are used for boom deployment exercises, DES boat orientation, and joint-agency spill exercises.

(6) The daily rates are modified, as noted in (3), for company-owned equipment only; rented trucks and heavy equipment are limited to actual cost + 10% markup, and cannot exceed the owned-equipment rate.

EXPLANATION

The Oil Pollution Control Fund under RSA 146-A, Hazardous Waste Cleanup Fund under RSA 147-B, and Gasoline Remediation and Elimination of Ethers Fund under RSA 146-G were established for environmental spill response and cleanup. The DES maintains contracts under these

The DES maintains contracts under these funds for conducting various oil spill response and cleanup activities to protect public health and the environment, often performed on an emergency basis. When a responsible party can be identified, the statutes authorize recovery of costs incurred by the State. These contracts are periodically renewed in consideration of preparedness for emergencies, changes in response and cleanup needs, identification of new threats, and economic conditions.

The DES will employ four initial response contractors to maintain adequate first responder capability and ensure coverage in all geographic regions of the state. Each contractor is required to respond when requested within a specific time, thus all four firms have an office and shop in New Hampshire. Remuneration under each contract for each year may vary depending on the type of work assigned. However, there will be a maximum expenditure as noted above for any one contractor and maximum aggregate expenditures of \$2,760,000 over the four-year contract period.

On October 2, 2012, the Department issued a Request for Qualifications (RFQ). Six (6) firms submitted qualifications packages and all contractors met the submission requirements. The DES Selection Committee evaluated each contractor's qualifications and experience, and scored the qualifications submissions. The rankings indicated that Clean Harbors Environmental, Inc., Bow, ENPRO Services Inc., Pembroke, TMC Environmental Services, Portsmouth, and Cyn Environmental Services, Dover, were the highest scoring firms. It was decided that four contractors would be awarded contracts with DES based on successful negotiation of a price schedule and performance standards.

See Attachments A and B for ranking of the six firms, evaluation scores, DES Selection Committee members, and funding allocation per contractor.

The contractors were pre-qualified to perform cleanup and emergency response work in accordance with standard practice for remediation services on a job-order basis. Contractors will be assigned work based on location, experience, and capabilities. The DES will evaluate the degree to which the contractors meet project needs based on responsiveness, proximity to an event, capability, and past performance.

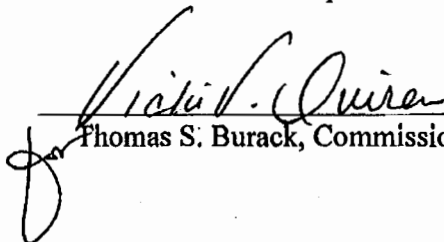

Unit prices in the Price Schedule, Exhibit B-1 are established for the initial year of the contract period based on an evaluation of fair market value, economic factors, and contractor input, and unit prices will be reviewed annually for consistency with fair market value, current rates, and economic conditions. The Department may revise the contract price schedule, as warranted, with notice to each contractor. However, the total value of each contract and the aggregate expenditure for the four-year period will not increase due to price schedule updates.

The DES has a long history of response and cleanup management experience, and program personnel are qualified to oversee all components of the contractor's work. DES has awarded term contract remediation services with the four firms in the past, and is confident that all contractors will perform in a professional and expedient manner under the current contracts.

The contracts were approved by the Department of Justice as to form, content, and execution. In the event the Funds are no longer available, General Funds will not be requested to support these contracts.

We respectfully request your approval.

(1) Prices will be evaluated and adjusted annually on or about July 1st, in consideration of CPI and other indexes

(2) DES shall determine whether to pay the purchase price or the use/rental cost for an item used on any assignment

(3) Since IR Service providers have experienced increased motor fuel costs and have not used the DES worksheet for calculating the cost differential, DES has applied a one-time adjustment to the rates for trucks and heavy equipment by a 5.7 % incremental cost factor for company-owned equipment.

(4) Assumes that any large quantity of soil will be disposed as bulk wastes, 5 drums or less is considered small quantity since 5 drums cost \$490 versus a minimum load 10 tons at \$42 per ton plus administrative costs.

(5) The new Boat Technician hourly rate will also be applied to IR Service personnel that are used for boom deployment exercises, DES boat orientation, and joint-agency spill exercises.

(6) The daily rates are modified, as noted in (3), for company-owned equipment only; rented trucks and heavy equipment are limited to actual cost + 10% markup, and cannot exceed the owned-equipment rate.

EXHIBIT C

Special Provisions

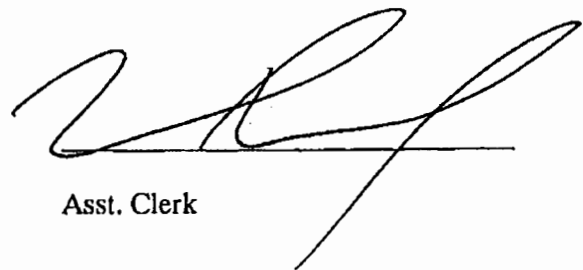

1. The Contractor shall maintain records of all work assignments in accordance with standard accounting practices and Department rules for technical reporting. Records shall be maintained for a period of seven (7) years following completion of a work assignment. The Contractor shall make all records available for audit and provide copies as required by the State. The records shall be retained in a manner that protects them from water, fire, and vandalism. At the end of the retention period, the Contractor shall offer the records to the State. If the State declines to accept the records, the records become the property of the Contractor.
2. The State shall obtain necessary rights-of-way, land easements, building entry, dock access, and any other access agreement necessary to fulfill the requirements of this Contract. The Contractor shall not enter upon or cross over private property unless the State has secured access or entry by legal or emergency authorization.
3. The State reserves the right to terminate any Contractor who fails to meet the Performance Standards or is found brokering a work assignment to another Contractor or to unqualified subcontractors.
4. Notwithstanding anything to the contrary herein, it is understood and agreed by the parties that Contractor will at all times under this Agreement retain any exemption or limitation from liability ("Responder Immunity") pursuant to the Federal Water Pollution Control Act, as amended (FWPCA) 33 U.S.C.A. § 1251 et seq., the Oil Pollution Act of 1990, as amended (OPA-90) 33 U.S.C.A. § 2701 et seq., and any other applicable Federal, state or local law, regulation or ordinance which provides such responder immunity. Operation of such immunity shall be suspended if Contractor is grossly negligent or engages in willful misconduct. For purposes of this indemnity, "gross negligence" shall not be deemed to include (a) Contractor's lack of available equipment or personnel, (b) failure of Contractor's equipment, (c) acts performed by the Contractor at the direction of the U.S. Coast Guard or other governmental authority, or (d) acts performed by the Contractor at the direction of the State or the State's other contractors.

EXPLANATION

The Oil Pollution Control Fund under RSA 146-A, Hazardous Waste Cleanup Fund under RSA 147-B, and Gasoline Remediation and Elimination of Ethers Fund under RSA 146-G were established for environmental spill response and cleanup. The DES maintains contracts under these

The DES maintains contracts under these funds for conducting various oil spill response and cleanup activities to protect public health and the environment, often performed on an emergency basis. When a responsible party can be identified, the statutes authorize recovery of costs incurred by the State. These contracts are periodically renewed in consideration of preparedness for emergencies, changes in response and cleanup needs, identification of new threats, and economic conditions.

The DES will employ four initial response contractors to maintain adequate first responder capability and ensure coverage in all geographic regions of the state. Each contractor is required to respond when requested within a specific time, thus all four firms have an office and shop in New Hampshire. Remuneration under each contract for each year may vary depending on the type of work assigned. However, there will be a maximum expenditure as noted above for any one contractor and maximum aggregate expenditures of \$2,760,000 over the four-year contract period.

On October 2, 2012, the Department issued a Request for Qualifications (RFQ). Six (6) firms submitted qualifications packages and all contractors met the submission requirements. The DES Selection Committee evaluated each contractor's qualifications and experience, and scored the qualifications submissions. The rankings indicated that Clean Harbors Environmental, Inc., Bow, ENPRO Services Inc., Pembroke, TMC Environmental Services, Portsmouth, and Cyn Environmental Services, Dover, were the highest scoring firms. It was decided that four contractors would be awarded contracts with DES based on successful negotiation of a price schedule and performance standards.

See Attachments A and B for ranking of the six firms, evaluation scores, DES Selection Committee members, and funding allocation per contractor.

The contractors were pre-qualified to perform cleanup and emergency response work in accordance with standard practice for remediation services on a job-order basis. Contractors will be assigned work based on location, experience, and capabilities. The DES will evaluate the degree to which the contractors meet project needs based on responsiveness, proximity to an event, capability, and past performance.

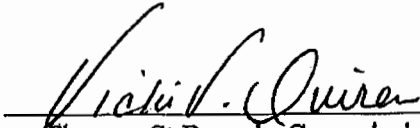

Unit prices in the Price Schedule, Exhibit B-1 are established for the initial year of the contract period based on an evaluation of fair market value, economic factors, and contractor input, and unit prices will be reviewed annually for consistency with fair market value, current rates, and economic conditions. The Department may revise the contract price schedule, as warranted, with notice to each contractor. However, the total value of each contract and the aggregate expenditure for the four-year period will not increase due to price schedule updates.

The DES has a long history of response and cleanup management experience, and program personnel are qualified to oversee all components of the contractor's work. DES has awarded term contract remediation services with the four firms in the past, and is confident that all contractors will perform in a professional and expedient manner under the current contracts.

The contracts were approved by the Department of Justice as to form, content, and execution. In the event the Funds are no longer available, General Funds will not be requested to support these contracts.

We respectfully request your approval.

(1) Prices will be evaluated and adjusted annually on or about July 1st, in consideration of CPI and other indexes

(2) DES shall determine whether to pay the purchase price or the use/rental cost for an item used on any assignment

(3) Since IR Service providers have experienced increased motor fuel costs and have not used the DES worksheet for calculating the cost differential, DES has applied a one-time adjustment to the rates for trucks and heavy equipment by a 5.7 % incremental cost factor for company-owned equipment.

(4) Assumes that any large quantity of soil will be disposed as bulk wastes, 5 drums or less is considered small quantity since 5 drums cost \$490 versus a minimum load 10 tons at \$42 per ton plus administrative costs.

(5) The new Boat Technician hourly rate will also be applied to IR Service personnel that are used for boom deployment exercises, DES boat orientation, and joint-agency spill exercises.

(6) The daily rates are modified, as noted in (3), for company-owned equipment only; rented trucks and heavy equipment are limited to actual cost + 10% markup, and cannot exceed the owned-equipment rate.

EXHIBIT C

EXPLANATION

The Oil Pollution Control Fund under RSA 146-A, Hazardous Waste Cleanup Fund under RSA 147-B, and Gasoline Remediation and Elimination of Ethers Fund under RSA 146-G were established for environmental spill response and cleanup. The DES maintains contracts under these

The DES maintains contracts under these funds for conducting various oil spill response and cleanup activities to protect public health and the environment, often performed on an emergency basis. When a responsible party can be identified, the statutes authorize recovery of costs incurred by the State. These contracts are periodically renewed in consideration of preparedness for emergencies, changes in response and cleanup needs, identification of new threats, and economic conditions.

The DES will employ four initial response contractors to maintain adequate first responder capability and ensure coverage in all geographic regions of the state. Each contractor is required to respond when requested within a specific time, thus all four firms have an office and shop in New Hampshire. Remuneration under each contract for each year may vary depending on the type of work assigned. However, there will be a maximum expenditure as noted above for any one contractor and maximum aggregate expenditures of \$2,760,000 over the four-year contract period.

On October 2, 2012, the Department issued a Request for Qualifications (RFQ). Six (6) firms submitted qualifications packages and all contractors met the submission requirements. The DES Selection Committee evaluated each contractor's qualifications and experience, and scored the qualifications submissions. The rankings indicated that Clean Harbors Environmental, Inc., Bow, ENPRO Services Inc., Pembroke, TMC Environmental Services, Portsmouth, and Cyn Environmental Services, Dover, were the highest scoring firms. It was decided that four contractors would be awarded contracts with DES based on successful negotiation of a price schedule and performance standards.

See Attachments A and B for ranking of the six firms, evaluation scores, DES Selection Committee members, and funding allocation per contractor.

The contractors were pre-qualified to perform cleanup and emergency response work in accordance with standard practice for remediation services on a job-order basis. Contractors will be assigned work based on location, experience, and capabilities. The DES will evaluate the degree to which the contractors meet project needs based on responsiveness, proximity to an event, capability, and past performance.

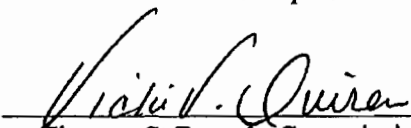

Unit prices in the Price Schedule, Exhibit B-1 are established for the initial year of the contract period based on an evaluation of fair market value, economic factors, and contractor input, and unit prices will be reviewed annually for consistency with fair market value, current rates, and economic conditions. The Department may revise the contract price schedule, as warranted, with notice to each contractor. However, the total value of each contract and the aggregate expenditure for the four-year period will not increase due to price schedule updates.

The DES has a long history of response and cleanup management experience, and program personnel are qualified to oversee all components of the contractor's work. DES has awarded term contract remediation services with the four firms in the past, and is confident that all contractors will perform in a professional and expedient manner under the current contracts.

The contracts were approved by the Department of Justice as to form, content, and execution. In the event the Funds are no longer available, General Funds will not be requested to support these contracts.

We respectfully request your approval.

(1) Prices will be evaluated and adjusted annually on or about July 1st, in consideration of CPI and other indexes

(2) DES shall determine whether to pay the purchase price or the use/rental cost for an item used on any assignment

(3) Since IR Service providers have experienced increased motor fuel costs and have not used the DES worksheet for calculating the cost differential, DES has applied a one-time adjustment to the rates for trucks and heavy equipment by a 5.7 % incremental cost factor for company-owned equipment.

(4) Assumes that any large quantity of soil will be disposed as bulk wastes, 5 drums or less is considered small quantity since 5 drums cost \$490 versus a minimum load 10 tons at \$42 per ton plus administrative costs.

(5) The new Boat Technician hourly rate will also be applied to IR Service personnel that are used for boom deployment exercises, DES boat orientation, and joint-agency spill exercises.

(6) The daily rates are modified, as noted in (3), for company-owned equipment only; rented trucks and heavy equipment are limited to actual cost + 10% markup, and cannot exceed the owned-equipment rate.
