EXPLANATION

These Requested Actions are identified as retroactive because the Notice of Award was not received with sufficient time to establish the MOA and allow for training and preparation by the Department of Justice in order to begin investigations and data collection by January 1, 2015.

This is a project administered and coordinated by the Division of Public Health Section's Maternal and Child Health Section, carried out in collaboration with the NH Office of Chief Medical Examiner (NH OCME). The Centers for Disease Control (CDC) grant for the Sudden Death in the Youth Registry will be used to expand the current CDC funded Sudden Unexpected Infant Death Registry which tracks sudden unexpected deaths in infants up to one year of age. The expansion will include deaths in youth up to age nineteen from conditions such as heart disease and epilepsy and will help investigators define the scope of the problem and set future research priorities. A child death review team will compile and review information on the cases from a variety of sources (i.e. death scene investigation report, medical records, autopsy report, etc.).

Cases that meet national project criteria will undergo further review by a state panel of clinical experts. Case data will be entered into a centralized data base under the authority of the Office of Chief Medical Examiner, managed by the Michigan Public Health Institute. After obtaining parental consent, the Office of Chief Medical Examiner will submit DNA samples from a subset of cases that will be kept at a centralized national repository. Neither the data nor the biorepository samples will contain personally identifiable information. The resulting national registry will become a resource for scientists to learn more about the causes of sudden death in the young and ultimately to develop better diagnostic and prevention approaches.

Funds are to be budgeted as follows:

- Class 041 (Audit Fund Set Aside): per state requirement.
- Class 049 (Transfers to Other State Agency): will be available to the Department of Justice and will support a part time Project Data Clerk within the Office of the Chief Medical Examiner, as well as related supplies and equipment necessary to coordinate the Sudden Death in Youth project for New Hampshire under the authority of RSA 611-B. Responsibilities of the Project Data Clerk include accessing and entering case information into the National Center for Child Death Review web-based data registry; and assisting with the coordination and follow up activities related to the death review and clinical expert panel meetings.
- Class 080 (Out of State Travel): needed for out of state travel to a grantee required meeting in Atlanta, GA in December 2014 by the Project Director.

In response to the anticipated two-part question, "Can these funds be used to offset General Funds?" and "What is the compelling reason for not offsetting General Funds?" the Division offers the following information: These funds may not be used to offset General Funds as they are specifically granted to the State for the purpose of providing the services described above.

These funds will not change the program eligibility levels. No new program will be established with the acceptance of these funds.

Area served: State of New Hampshire

Source of funds: These funds are 100% Federal from the Department of Health and Human Services, Assistant Secretary for Preparedness and Response, CDC Procurement and Grants Office to fund the Sudden Death in the Youth (SDY) Registry. Attached is the Notice of Grant Award and award history. Notice of these funds was received on September 26, 2014. They were not added to the operating budget because: These are new funds recently granted to the State and were not anticipated at the time the budget was developed.

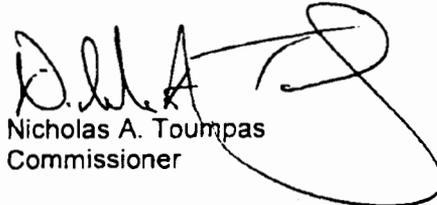

In the event that these Federal Funds become no longer available, General Funds will not be requested to support this program.
