EXPLANATION

Pursuant to RSA 362-F:10, the Commission is charged with administering the Renewable Energy Fund (REF), the purpose of which is to support thermal and electrical renewable energy initiatives. On January 8, 2021, the Commission issued a Request for Proposals (RFP) #2021-001 pursuant to RSA 362-F:10, X. That statute requires the Commission to issue, on an annual basis, an RFP for renewable energy projects in the nonresidential sector funded by grants from the REF.

The Commission received six (6) proposals requesting a total of \$2.053 million in funds in response to the RFP. The DCI, Inc. project and three (3) other proposals have been selected to receive a total of \$1,163,000 in this funding round. Attachment 1 provides additional information on the grant review and award process, and Attachment 2 provides a summary of all grant awards.

With these funds, DCI, Inc. will install a new wood residue-fueled steam boiler plant which will provide 100% of DCI's thermal energy needs in the form of process heat to kilns for drying lumber and firewood, and space heating to its plant. The steam boiler plant is expected to yield approximately 8,580 New Hampshire Class I Thermal RECs annually. The project's technical specifications are described in Attachment 3.

The grant is contingent on sufficient REF funds being available upon the effective date of the grant agreement. The funds have been allocated for this contract, and are being held in the fund. In the event that the REF funds are insufficient or are no longer available, General Funds will not be requested to support this program.

I am available to answer any questions you may have. Thank you very much for your consideration.

Respectfully submitted,

Dianne Martin, Esq. Chairwoman (603)931-2389

ATTACHMENT 1 - NONRESIDENTIAL COMPETITIVE GRANT REVIEW PROCESS

The Public Utilities Commission (PUC) issued a Request for Proposals (RFP) on January 8, 2021 for renewable energy projects in the nonresidential sector which would be eligible to generate Class I, Class I Thermal, or Class IV renewable energy certificates (RECs). The RFP was generally similar to that issued in the prior year. The RFP required that the project create certain classes of RECs, which would be available for use by electricity providers for compliance with the renewable portfolio standard requirements in New Hampshire. Pursuant to RSA 362-F:10, the RFP is funded with monies from the Renewable Energy Fund and issued on an annual basis.

The RFP was widely circulated electronically to members of the Energy Efficiency and Sustainable Energy Board (EESE Board), regular attendees at EESE Board meetings, additional stakeholders known to have an interest in energy policy and programs, and Clean Energy NH. The RFP was posted on the PUC website for the full submission period, and was advertised in the New Hampshire Union Leader on January 11 – 13, 2021. All responses were due by February 12, 2021. The Commission received six (6) proposals requesting a total of \$2.053 million in grant funds for projects with combined estimated total project costs of \$20.858 million.

The PUC employed a two-tier grant review process to evaluate the proposals. The initial review team consisted of members of the PUC, the Department of Environmental Services, and the Office of Strategic Initiatives. The second review team consisted of the PUC Commissioners.

The initial review team scored the six (6) proposals using the scoring criteria set forth in the RFP and those requirements set forth in N.H. Code of Administrative Rules Puc 2508.02 (b) and (c). Based on proposal scores and the program budget, the initial review team provided a recommendation to the Commission.

The Commissioners were provided with project scores, project descriptions, and recommendations for funding. The Commissioners approved grant funding for four (4) renewable energy projects in the total amount of \$1,163,000.

DCI Furniture State-of-the-Art Biomass Cogeneration Steam Energy Project Facts and Figures

DCI, Inc. will install a new wood residue-fueled steam boiler plant which will provide 100% of DCI's thermal energy needs in the form of process heat to kilns for drying lumber and firewood, and space heating to its plant. Surplus heat will drive an existing backpressure steam generator to provide approximately 30% of DCI's electric load. An electrostatic precipitator will reduce emissions and enable the generator to certify for New Hampshire Class I Thermal RECs. The steam boiler plant is expected to yield approximately 8,580 New Hampshire Class I Thermal RECs annually.

Facility Size: Biomass Boiler 3 MW (300 hp)

Grant Cost Effectiveness¹: \$5.83/REC (over 10 years)

Funding Analysis:

Total Project Cost: \$2,863,000

Leveraged Funds: \$2,363,000 (including \$250,000 USDA REAP Grant)

Grant Amount: \$500,000

Financial and Environmental Benefits:

Energy Generation: 29,275 MMBtu/year (Displacing ~381,200 gallons of propane and

~850,000 kWh of electricity)

Generation Valueⁱⁱ: \$226,083/year REC sales; plus potential fuel cost savings

20-Year LCOEⁱⁱⁱ: \$0.135/kWh Life Expectancy: 30 years

CO₂ Avoided: 2,358 tons/year

Renewable Portfolio Standard RSA 362-F:1 Criteria:

- Generates 8,580 Class I Thermal renewable energy certificates (RECs) per year
- Supports fuel diversity
- Provides energy savings to DCI, Inc.
- Reduces the amount of greenhouse gases, nitrogen oxides and particulate matter emissions compared to fuel oil; thereby improving air quality and public health

¹ The PUC used a metric defined as the requested grant amount divided by the total number of RECs over ten (10) years of operation as a key criteria in evaluating and choosing grantees.

Generation value is based on the Alternative Compliance Payment (ACP) value for the project's estimated annual REC generation. The ACP rate for Class I Thermal is \$26.35/MWh in 2021; therefore, 8,580 RECs/year is equivalent to \$226,083 in Generation Value.
