

THE STATE OF NEW HAMPSHIRE
DEPARTMENT OF TRANSPORTATION

35 Bond

VICTORIA F. SHEEHAN
COMMISSIONER

WILLIAM CASS, P.E.
ASSISTANT COMMISSIONER

Bureau of Construction
November 1, 2016

Her Excellency, Governor Margaret Wood Hassan
and the Honorable Council
State House
Concord, New Hampshire 03301

REQUESTED ACTION

1. Authorize the Department of Transportation to enter into a contract with CPM Constructors, Inc. (Vendor 153179) of Freeport, ME on the basis of a low bid of \$2,836,393.60 for bridge preservation work on the bridge carrying NH 16 over the Saco River in Conway, from the date of Governor and Council approval through May 17, 2019 unless extended by the Department in accordance with the Standard Specifications. 100% Federal Funds.

Funding is available as follows for FY 2017, and is contingent upon the availability and continued appropriation of fund for FY 2018 and FY 2019:

Table with 4 columns: Funding is available as follows, FY 2017, FY 2018, FY 2019. Row 1: 04-96-96-963515-3054 Consolidated Federal Aid. Row 2: 400-500870 Highway Contract Payments \$836,393.60 \$1,400,000.00 \$600,000.00

2. Further authorize that a contingency in the amount of \$283,639.36 be approved for payment of latent conditions, which may appear during the construction of the project. The contingency requested is 10% of the contract amount.

Table with 4 columns: Funding is available as follows, FY 2017, FY 2018, FY 2019. Row 1: 04-96-96-963515-3054 Consolidated Federal Aid. Row 2: 400-500870 Highway Contract Payments \$83,639.36 \$140,000.00 \$60,000.00

EXPLANATION

This project is part of the State's Ten Year Transportation Improvement Plan. This project consists of bridge preservation work on the bridge (Conway Br. No. 170/071) carrying NH 16 over the Saco River. The work limits for the bridge begin approximately 150 feet south of the bridge and continues approximately 650 feet north along NH 16. The project consists of removing the existing asphalt and membrane, conducting full and partial depth deck repairs, complete replacement of the copings, bridge rail and approach rail units, replacement of the deck joints, replacement of the abutment bearings, repairs to the abutments, new membrane and asphalt on the bridge and painting the entire superstructure. Additional work includes roadway work to match back into the existing roadway, replacement of approach rail and terminal units on the south approach and matching into existing guardrail on the north approach.

This existing bridge was built in 1945 and received a new concrete deck in 1977. The currently condition rating is 6 (Deck, satisfactory), 7 (Superstructure, good), and 6 (Substructure, satisfactory). The concrete deck is showing signs of deterioration and the expansion joints are leaking on the abutments with significant deterioration of the steel bearings and steel cross frame elements. This preservation project will address and fix these issues to extend the life of the structure and keep it off the State's red list.

The contingency amount is proposed to be 10%. This work rehabilitates a bridge that saw its last major rehab back in 1977. The joints at the abutments heavily leak, and the extent of deterioration of the superstructure steel in this vicinity is unknown. In addition, the work includes partial and full depth deck repairs. The extent of this work has been estimated, but the full extent of the work won't be fully known until the existing asphalt and membrane are removed from the bridge. These factors increase the risk of overruns.

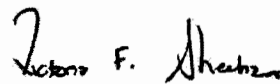

Although the bid costs exceeded the Department's estimate by 3.5%, the low bid is felt to be reasonable for the work involved. Re-advertising this project would result, in our opinion, in higher prices and prevent the completion of the work in a timely manner. The Department considers it to be in the best interest of the State to accept this bid to accomplish these needed repairs.

The Contractor has been prequalified by this Department. The Contract has been approved by the Attorney General as to form and execution, and the Department has certified that the necessary funds are available and the bid reasonably conforms to the engineer's estimate in accordance with State procedure. Copies of the fully executed contract are on file at the Secretary of State's Office and the Department of Administrative Service's Office, and subsequent to Governor and Council approval will be on file at the Department of Transportation.

This project funding is 80% federal funds with 20% state match. Turnpike toll credit is being utilized for match requirements, effectively using 100% federal funds.

A copy of the Tabulation of Bids received for this project is attached along with the Contract Supplemental Sheet and a map indicating the location of the project.

Sincerely,

Victoria F. Sheehan
Commissioner

VFS/md

Department Estimate: \$2,740,545.97
Contract Amount: \$2,836,393.60
Over Estimate: \$ 95,847.63

SUPPLEMENTAL PROJECT INFORMATION SHEET

DESCRIPTION: This project consists of bridge preservation work on the bridge (Conway Br. No. 170/071) carrying NH 16 over the Saco River. The work limits for the bridge begin approximately 150 feet south of the bridge and continues approximately 650 feet north along NH 16. The project consists of removing the existing asphalt and membrane, conducting full and partial depth deck repairs, complete replacement of the copings, bridge rail and approach rail units, replacement of the deck joints, replacement of the abutment bearings, repairs to the abutments, new membrane and asphalt on the bridge and painting the entire superstructure. Additional work includes roadway work to match back into the existing roadway, replacement of approach rail and terminal units on the south approach and matching into existing guardrail on the north approach.

FEDERAL FUNDING: 80% with anticipated utilization of Turnpike Toll credits as the State's 20% match.

CONTINGENCY: The contingency amount is proposed to be 10%. This work rehabilitates a bridge that saw its last major rehab back in 1977. The joints at the abutments heavily leak, and the extent of deterioration of the superstructure steel in this vicinity is unknown. In addition, the work includes partial and full depth deck repairs. The extent of this work has been estimated, but the full extent of the work won't be fully known until the existing asphalt and membrane are removed from the bridge. These factors increase the risk of overruns.

PROJECT INITIATED: State's 10-Year Transportation Improvement Plan

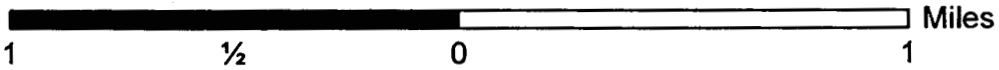

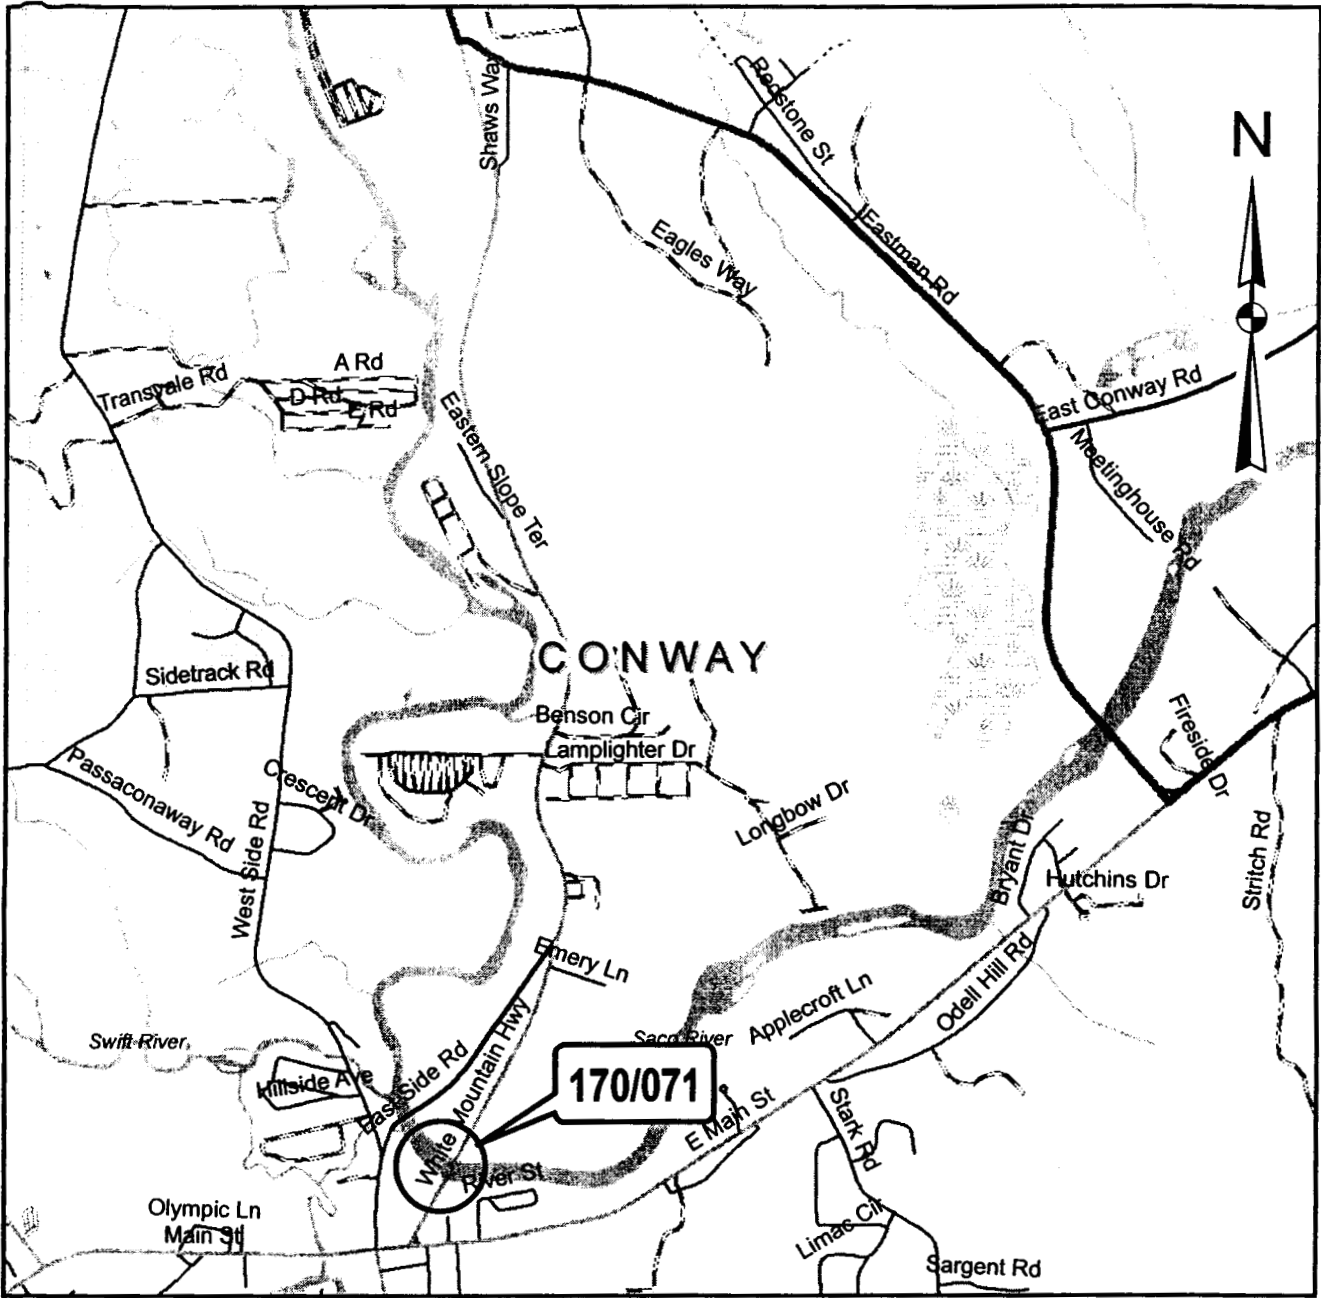

PROJECT EXPLANATION: This existing bridge was built in 1945 and received a new concrete deck in 1977. The currently condition rating is 6 (Deck, satisfactory), 7 (Superstructure, good), and 6 (Substructure, satisfactory). The concrete deck is showing signs of deterioration and the expansion joints are leaking on the abutments with significant deterioration of the steel bearings and steel cross frame elements. This preservation project will address and fix these issues to extend the life of the structure and keep it off the State's red list.

TRAFFIC IMPLICATIONS: The bridge is located approximately 1000' north of the intersection of NH 16 and NH 113. The bridge is too narrow to maintain two lanes of traffic during the work, and the close proximity to the intersection does not allow for one-lane alternating two-way traffic. Therefore, NH 16 southbound will be maintained across the bridge during both phases of the bridge rehab. NH 16 northbound traffic will be detoured easterly on NH 113 to US 302 and then northerly back to NH 16. The use of the detour necessitates the adjustment of curb at two locations along the detour route to accommodate lane usage reassignment to change the lane usage from 1 to 2 lanes. These locations are at the intersection of NH 113/US 302 and US 302/North-South Road. At both locations, the curb realignment will be permanent but the lane reassignment will only be permanent at US 302/North-South Road. Additionally, a new, permanent signal mast arm and permanent lane reassignment will be installed at the intersection of US 302/Shaw's entrance, and a permanent signal span wire is required at the intersection of NH 113/US 302. Temporary lane reassignment is necessary at the intersections of NH 113/US 302 and NH 16/NH 113.

This project is anticipated to take two years. The rehab of the bridge will occur in 2017 while the painting will occur in 2018. The detour will be required during both phases but the temporary lane reassignments will only be required during the first year. However, because of Town and local business concerns about impacts the project duration will have on the local economy, provisions have been written into the contract that will force the contract to a three year duration if the the first half of the rehab is not complete by a set date. In this case, the detour will be required for three years and temporary lane reassignment will occur in the second rehab year at the discretion of the DCE.

CERTIFICATE OF LIABILITY INSURANCE

DATE (MM/DD/YYYY)
10/28/2016

THIS CERTIFICATE IS ISSUED AS A MATTER OF INFORMATION ONLY AND CONFERS NO RIGHTS UPON THE CERTIFICATE HOLDER. THIS CERTIFICATE DOES NOT AFFIRMATIVELY OR NEGATIVELY AMEND, EXTEND OR ALTER THE COVERAGE AFFORDED BY THE POLICIES BELOW. THIS CERTIFICATE OF INSURANCE DOES NOT CONSTITUTE A CONTRACT BETWEEN THE ISSUING INSURER(S), AUTHORIZED REPRESENTATIVE OR PRODUCER, AND THE CERTIFICATE HOLDER.

IMPORTANT: If the certificate holder is an ADDITIONAL INSURED, the policy(ies) must be endorsed. If SUBROGATION IS WAIVED, subject to the terms and conditions of the policy, certain policies may require an endorsement. A statement on this certificate does not confer rights to the certificate holder in lieu of such endorsement(s).
