EXPLANATION

The purpose of this request is for statewide lead risk assessments and lead educational services for families where a child with a blood lead level equal to, or greater than, 5.0ug/dL resides in an owner-occupied home.

Individuals who are permanent or seasonal residents of the State of New Hampshire, that own a residence that was built prior to 1978 and have a child in the home with a blood lead level equal to or over 5.0ug/dL qualify for the lead risk assessment. All property owners who qualify will receive a Certificate of Eligibility from the Department. Approximately 72 properties will be inspected from October 21, 2020 to June 30, 2023.

If a property owner meets the requirements, as outlined above, for the lead risk assessment, the Department will provide them the Contractor's contact information. The Contractor will coordinate with the property owners to complete a lead risk assessment of their property. Upon completing the assessment, the Contractor will provide a detailed written report of the assessment results to the property owner as well as lead education. The Contractor will also assist property owners with completing Housing and Urban Development (HUD) Lead Hazard Reduction grant applications. Additionally, the property owners will be provided with a High Efficiency Particulate Air (HEPA) vacuum cleaner or other materials, as needed to assist with decreasing exposure to lead hazards.

The Department will review all lead inspections and risk assessments and receive quarterly reports to:

- Ensure timeliness of services provided.
- Confirm materials provided to property owners.
- Review all feedback provided by property owners.

The Department selected the Contractor through a competitive bid process using a Request for Bids (RFB) that was posted on the Department's website from 8/18/2020 through 9/17/2020. The Department received one (1) response that was reviewed and scored by a team of qualified individuals. The Scoring Sheet is attached.

As referenced in Exhibit A of the attached contract, the parties have the option to extend the agreement for up to three (3) additional years, contingent upon satisfactory delivery of services, available funding, agreement of the parties, and Governor and Council approval.

Should the Governor and Council not authorize this request, property owners with a child in the home with a blood lead level equal to, or greater than, 5.0ug/dL may not have the ability to identify where the lead hazards are in their homes. The property owner may not have access to a no cost, full lead inspection and risk assessment and materials needed to assist with decreasing a child's exposure to lead hazards.

The certification or explanation will be considered in connection with the NH Department of Health and Human Services' (DHHS) determination whether to enter into this transaction. However, failure of the prospective primary participant to furnish a certification or an explanation shall disqualify such person from participation in this transaction.
3. The certification in this clause is a material representation of fact upon which reliance was placed when DHHS determined to enter into this transaction. If it is later determined that the prospective primary participant knowingly rendered an erroneous certification, in addition to other remedies available to the Federal Government, DHHS may terminate this transaction for cause or default.
4. A participant may decide the method and frequency by which it determines the eligibility of its principals. Each participant may, but is not required to, check the Nonprocurement List (of excluded parties).
9. Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render in good faith the certification required by this clause. The knowledge and
