EXPLANATION

This request is **sole source** because the instrument HidexSL Liquid Scintillation Counter is a proprietary device that Lablogic manufactures and it the only vendor that can provide the service, maintenance and repair. The instrument must be serviced on a regular basis in order to secure accurate testing results; this is the only vendor that can certify the device.

The purpose of this request is to service, maintain and repair the HidexSL Liquid Scintillation Counter. The Liquid Scintillation Counter is used to measure the radiation levels in food and environmental samples. The service, maintenance and repair of the device are paramount to the success of the data that is derived.

The Liquid Scintillation Counter is used to process environmental samples for radiological levels during routine environmental monitoring and emergency response events.

The HidexSL Liquid Scintillation Counter provides data to assist with radiological emergency responses; monitoring of the use of radioactive materials in NH; food control for Strontium-90 and Americium-241; Plutonium-239; and Uranium. The device also monitors radioactive effluent measurements at nuclear power plants, which is a required emergency preparedness activity related to nuclear power and homeland security. All of these activities ensure the protection of the environment and population of NH.

The Department will monitor the effectiveness of the Contractor and the delivery of services under this agreement using the following performance measures:

- The Contractor must provide service within one (1) business day of the initial call for services.
- The Contractor must provide test results to assure the instrument is functioning according to factory acceptable standards.
- The Contractor must provide software updates within thirty (30) days of the instrument being serviced.

As referenced in the C-1 of this contract, the parties have the option to extend contract services for up to two (2) additional years, contingent upon satisfactory delivery of services, available funding, agreement of the parties and approval of the Governor and Executive Council.

Should the Governor and Executive Council not authorize this request, the instrument may provide inaccurate results, which could lead to catastrophic environmental events. If the instrument becomes inoperable, the State would not have the ability to analyze environmental samples putting the population at risk.

Area served: Statewide.

Source of Funds: 100% Other Funds

In the event that the Other Funds become no longer available, General Funds will not be requested to support this program.

Respectfully submitted,

Kerrin A. Rounds
Commissioner

Subject: Maintenance and Repair of the Hidex 300 SL

- 20.6. **SUPPLANTING OTHER FEDERAL FUNDS:** Funds provided to the Contractor under this Contract will not supplant any existing federal funds available for these services.
