**SUPPLEMENTAL PROJECT INFORMATION SHEET**

**DESCRIPTION:** This project requires signal work at multiple locations statewide:

Replacement of the traffic signal pole, mast arm, and foundation for the signal S-315-12 at the end of the southbound ramp for Exit 1 of the FE Everett Turnpike in Nashua.

Replacement of the traffic signal pole, mast arm, and foundation for the signal S-315-03 at the end of the southbound ramp for Exit 4 of the FE Everett Turnpike in Nashua.

Replacement of the traffic signal pole, mast arm, and foundation for the signal S-431-05 on NH Route 33 at Squamscott Road in Stratham.

Replacement of the traffic signal pole, mast arm, and foundation for the signal S-389-14 at the end of the southbound ramp for Exit 15 of the Spaulding Turnpike in Rochester.

Replacement of various traffic signal components for the signal S-431-02 at NH 101 over NH 108 bridge structure in Stratham.

Replacement of meters and pedestals for existing traffic signals at 11 locations around the State.

**FEDERAL FUNDING:** 0% (34% Program: Turnpike Renewal and Replacement, 66% Program: Betterment)

**PROJECT INITIATED:** To address various recent crash damage to signals & other related signal needs.

**CONTINGENCY:** The proposed contingency amount is 5% of the contract amount. This is to account for the risks associated with unanticipated traffic control needs and the potential for necessary but unanticipated repair work to traffic signal-related equipment and other existing infrastructure near the work areas.

**PROJECT EXPLANATION:** To replace signal mast arms that have been damaged by collisions, replace deteriorated under-bridge signal hangers, update electric meters/pedestals, and complete signal-related equipment improvements.

**TRAFFIC IMPLICATIONS:** Lane closures, shoulder closures and night work are anticipated on this contract. The Contractor may determine to erect the mast arms at night. Lane closures will be used to allow for the removal and installation of signal equipment and will be restricted to off-peak traffic periods. Lane and shoulder closures will be permitted during daytime operations during off peak timeframes or at night and where the work is outside the traveled way. Uniformed officers will be required for both lane and shoulder closures due to the high-speed and high-volume nature of the facilities.
