DEPARTMENT OF ENVIRONMENTAL SERVICES

Thomas S. Burack, Commissioner

June 20, 2016

Her Excellency, Governor Margaret Wood Hassan
and The Honorable Council
State House
Concord, NH 03301

REQUESTED ACTION

Authorize the Department of Environmental Services to amend an agreement (PO # 1042059) with the Town of Alstead, NH, (VC # 177348) for the *Lower Warren Brook Restoration Project* by: a) increasing the Grant Limitation to \$93,900 from \$87,400; b) increasing the required match documentation to \$62,631 from \$58,300; and, c) reducing the insurance required as detailed in attached Amendment, effective upon Governor and Council approval through December 31, 2016. The original agreement was approved by the G&C on January 28, 2015, Item #43. 100% Federal Funds.

Funding is available in the account as follows:

FY 2017
\$6,500

Dept. Environmental Services, NPS Restoration Program, Grants-Federal

EXPLANATION

DES is requesting this Amendment to provide additional funds to cover the costs associated with construction of the proposed stream restoration project. The funding is needed because the construction bid results were higher than anticipated at the outset of the project. The primary factor in the higher cost estimate was the need to demolish, transport, and dispose of remnants of a previously unknown buried concrete structure that was discovered in the brook's floodplain. The Town has secured additional matching funds to contribute to the increased project costs. The amendment also includes a reduction in liability insurance coverage. The original contract included higher than necessary coverage limits. That higher limit insurance has become cost prohibitive for the Town and is beyond both the state requirements and industry standards. In the amended agreement, the Town will maintain liability coverage meeting the terms of the Standard State Agreement, and ensure that the contractors performing the project work are covered at the required levels. A copy of the original agreement is included as Attachment B.

This project involves the design, permitting, and construction of repairs and modifications within a 900-foot long section of Warren Brook in Alstead, NH. This stream segment was severely damaged by the devastating 2005 flood, and was the subject of some restoration work using natural channel design methods in 2010. The previous restoration design was funded under a Watershed Restoration Grant and constructed with funding from the US Fish and Wildlife Service. The restoration work remained intact and functioning properly until June of 2013, when about 6 inches of rain fell on the watershed in approximately five hours. The resulting flooding led to a declaration of federal disaster for Cheshire County. Damage to the project area included: removal of two log vane/root wad structures; 150 feet of

bank erosion; dislodging boulders at two rock cross-vane structures; and, significant stream bed scour and sediment deposition.

This project represents a unique opportunity to address many facets of stream restoration including: correcting existing deficiencies and thereby restoring channel stability; enhancing aquatic and riparian habitats; reducing future erosion, scour, and sediment deposition; improving water quality and floodplain functions; and providing information about the suitability of the durability of various restoration measures which will inform future stream restoration projects in New Hampshire.

The total revised project costs are budgeted at \$156,531. DES will provide \$93,900 (60%) of the project costs through a federal grant and the Town of Alstead will provide the remaining costs through cash and in-kind services. An amended budget breakdown is provided in Attachment A. In the event that Federal Funds become no longer available, General Funds will not be requested to support this program. The amendment has been approved by the Office of the Attorney General as to form, execution, and content.

We respectfully request your approval.

REQUESTED ACTION

Authorize the Department of Environmental Services to enter into an agreement with the Town of Alstead, NH (VC # 177348) in the amount of \$87,400 to complete the Lower Warren Brook Restoration Project, effective upon Governor and Council approval through December 31, 2016. 100% Federal Funds.

Funding is available in the accounts as follows:

EXPLANATION

The Department of Environmental Services (DES) issued a Request for Proposals (RFP) for the 2014 Watershed Assistance Grants program. Fourteen proposals were received. The proposals were ranked based on the criteria included in the RFP: water quality improvement or protection; cost/benefit ratio; local capacity to complete the project; relative value or significance of the water body; and, general quality and thoroughness of the proposal. Based on results of the selection process and available federal grant funding levels, the eleven highest ranked projects were selected to receive funding. Please see Attachment B for a list of project rankings and review team members.

The Watershed Assistance Grants focus on the reduction of nonpoint source (NPS) pollution. NPS pollution occurs when rainfall, snowmelt, or irrigation water runs over land or through the ground, transporting materials which are then deposited into rivers, lakes, and coastal waters, or introduced into the groundwater. Pollutants can include chemicals, sediments, nutrients, and toxics. These materials can have harmful effects on drinking water supplies, recreation, fisheries, and wildlife. Land development or changes in land use can also cause NPS pollution by disrupting the natural hydrology of a water body, increasing impervious surfaces, and contributing to the loss of aquatic habitat. Watershed Assistance programs address NPS pollution by promoting good land use practices on a watershed scale.

The proposed project involves the design, permitting, and construction of repairs and modifications within a 900-foot long section of Warren Brook in Alstead, NH. This stream segment was severely

damaged by the devastating 2005 flood, and was the subject of some restoration work using natural channel design methods in 2010. The previous restoration design was funded under a Watershed Restoration Grant and constructed with funding from the US Fish and Wildlife Service. The restoration work remained intact and functioning properly until June of 2013, when about 6 inches of rain fell on the watershed in approximately five hours. The resulting flooding led to Cheshire County being declared a federal disaster area. Damage to the project area included: removal of two log vane/root wad structures; about 150 feet of bank erosion; dislodging boulders at two rock cross-vane structures; and, significant stream bed scour and sediment deposition.

The proposed project represents a unique opportunity to address many facets of stream restoration including: correcting existing deficiencies and thereby restoring channel stability; enhancing aquatic and riparian habitats; reducing future erosion, scour, and sediment deposition; improving water quality and floodplain functions; and providing information about the suitability of durability of various restoration measures which will inform future stream restoration projects in New Hampshire.

The total project costs are budgeted at \$145,700. DES will provide \$87,400 (60%) of the project costs through a federal grant and the Town of Alstead will provide the remaining costs through cash and in-kind services. A budget breakdown is provided in Attachment A. In the event that Federal funds become no longer available, general funds will not be requested to support this program. The agreement has been approved by the Office of the Attorney General as to form, execution, and content.

We respectfully request your approval.

12.3 In the event of Termination under paragraphs 10 or 12.4 of these general provisions, the approval of such a Termination Report by the State shall in no event relieve the Grantee from any and all liability for damages sustained or incurred by the State as a result of the Grantee's breach of its obligations hereunder.

12.4 Notwithstanding anything in this Agreement to the contrary, either the State or except where notice default has been given to the Grantee hereunder, the Grantee, may terminate this Agreement without cause upon thirty (30) days written notice.

13. CONFLICT OF INTEREST. No officer, member or employee of the Grantee and no representative, officer or employee of the State of New Hampshire or of the governing body of the locality or localities in which the Project is to be performed, who exercises any functions or responsibilities in the review or approval of the undertaking or carrying out of such Project, shall participate in any decision relating to this Agreement which affects his or her personal interests or the interest of any corporation, partnership, or association in which he or she is directly or indirectly interested, nor shall he or she have any personal or pecuniary interest, direct or indirect, in this Agreement or the proceeds thereof.
