### From Playrooms to Boardrooms: Encouraging STEM Careers for All

Education research touts the benefits of ensuring that all children, from an early age, are exposed to and encouraged to explore the STEM areas of science, technology, engineering and mathematics. STEM education jobs are expected to grow by 33 percent by 2020, and currently, women account for less than 30 percent of science and engineering jobs. Hear from GoldieBlox founder Debbie Sterling, whose books, toys and apps build confidence in STEM areas, and learn how state legislators can nurture young entrepreneurs in these areas from early childhood through beginning their careers.

### General Session Lunch: Where Do We Go From Here? Leadership in Challenging Times

Presidential historian Doris Kearns Goodwin will reflect on more than 150 years of U.S. history to put into context our most recent unconventional presidency. Goodwin will share her deep understanding of the ambition, resolution and resilience of some of our nation's most revered presidents, and explain how past setbacks and triumphs shed light on the cultural, economic and political transformations that define today's times. Goodwin will bring to life some of our most successful presidents to provide insight for today's leaders, and to demonstrate that however fractured our modern political culture has become, our democracy is also resilient and has survived—even thrived—through troubling times in the past.
