Dept. Environmental Services, In-Lieu Wetland Mitigation, Grants – Non - Federal	

EXPLANATION

New Hampshire RSA 482-A:3 requires a wetland permit for any proposed project that involves dredging or filling of a wetland. Before a wetland permit is issued, applicants must show that the proposed project will avoid adverse impacts to wetlands and will minimize and provide compensation for those wetland impacts which are unavoidable.

The DES wetlands program adopted a set of mitigation rules that establish what is necessary for an applicant to provide for wetland compensation. The current department rules spell out ratios for wetland compensation that include creating a new wetland, restoring a former wetland site, or protecting a high-quality aquatic resource by preserving adjacent upland habitat. The newest improvement, begun in 2006, to the mitigation options is commonly referred to as an *in-lieu fee program*. This mitigation option is ideal for projects that have difficulty in locating an appropriate mitigation site. The Aquatic Resource Mitigation Fund (ARM) authorizes the collection of mitigation funds in lieu of other forms of wetland mitigation as part of a Wetlands Permit Application.

The Department issued the request for proposals for ARM Funds available in the Salmon Falls – Piscataqua River watershed in April, 2014. Four applications were received and on November 4, 2014, DES announced the decision to fund the SELTNH project in the Salmon Falls - Piscataqua River Watershed. The project proposed by the Town was recommended for funding by the ARM Fund Site Selection Committee. Attachment A lists the proposals received and Committee members involved in the decision. The review of the awards by the Army Corps of Engineers and the New Hampshire Wetland Council resulted in full support of the recommendations.

Her Excellency, Governor Margaret Wood Hassan
And the Honorable Council
Page 2 of 2

The ARM funds provided to the SELTNH will protect the Garrison property located entirely within the Spruce Swamp Core Focus Area as designated by the Land Conservation Plan for NH's Coastal Watersheds. The Swamp is an 824 acre fen nestled in a 1,700+ acre unfragmented forest with documented vernal pools. This forest and wetland combination is ranked as the highest quality wildlife habitat in the state and is home to thirteen species of plants and animals of greatest conservation concern in NH. The NH Fish and Game Department has monitored and trapped Blanding's turtles in the Spruce Swamp area and distinguishes this area as a part of the "top 10 sites" for Blanding's turtles. This location is also important for spotted turtles, wood frogs, and spotted salamanders as well.

In the event that other funds no longer become available, general funds will not be requested to support this program. This agreement has been approved as to form, content, and execution by the Attorney General's Office.

We respectfully request your approval.

Thomas S. Burack, Commissioner
