VICTORIA F. SHEEHAN
COMMISSIONER

WILLIAM CASS, P.E.
ASSISTANT COMMISSIONER

Bureau of Construction
October 3, 2016

Her Excellency, Governor Margaret Wood Hassan
and the Honorable Council
State House
Concord, New Hampshire 03301

REQUESTED ACTION

1. Authorize the Department of Transportation to enter into a contract with Continental Paving, Inc. (Vendor 155350) of Londonderry, NH on the basis of a low bid of \$9,916,163.25 for pavement and bridge rehabilitation along I-93 in Thornton and Woodstock, from the date of Governor and Council approval through October 5, 2018 unless extended by the Department in accordance with the Standard Specifications. 100% Federal Funds.

Funding is available as follows for FY 2017, and is contingent upon the availability and continued appropriation of fund for FY 2018:

Table with 3 columns: Funding is available as follows, FY 2017, FY 2018. Row 1: 04-96-96-963515-3054 Consolidated Federal Aid. Row 2: 400-500870 Highway Contract Payments \$3,000,000.00 \$6,916,163.25

2. Further authorize that a contingency in the amount of \$297,484.90 be approved for payment of latent conditions, which may appear during the construction of the project. The contingency requested is 3% of the contract amount.

Funding is available as follows for FY 2017, and is contingent upon the availability and continued appropriation of fund for FY 2018:

Table with 3 columns: Funding is available as follows, FY 2017, FY 2018. Row 1: 04-96-96-963515-3054 Consolidated Federal Aid. Row 2: 400-500870 Highway Contract Payments \$100,000.00 197,484.90

EXPLANATION

This project is part of the State' Ten Year Plan under the Interstate Maintenance and Interstate Pavement Preservation program and the Bridge Rehabilitation, Preservation and Improvement program. The project consists of pavement and bridge rehabilitation along Interstate 93 from Mile 88.2 (2000' south of Exit 29) and extending northerly for 7.2 miles to Mile 95.4, (2000' north of Exit 30). Pavement work includes cold recycling of the left lane and shoulder, 4" deep, full width leveling course, and full width

1.5" overlay. Ramps at Exits 29 and 30 will receive a 2" inlay, full width. Incidental work includes rock scaling at 2 locations, guardrail repair / replacement, minor drainage rehabilitation, sign replacements, replacement of two sets of existing traffic study loops, and a 1" inlay, full width, on the mainline approaches (to eliminate traffic control markings). Bridge work includes replacement of expansion joints on 4 bridges (243/076 & 243/077 I-93 over US 3 and 202/064 & 203/064 I-93 over US3 and a Railroad); expansion joint, pavement, and membrane replacement on 2 bridges (173/064 & 173/066 I-93 over Merrill Rd); and replacement of plug joints on 2 bridges (201/034 & 202/034 I-93 over Mirror Lake Rd).

This segment of I-93 was reclaimed and paved with 6" of new pavement in 2002/2003. Crack sealant was applied in 2007, and a slurry seal preservation treatment of the travel lanes was completed in 2008. The slurry seal has reached the end of its service life, and pavement cores indicate that full depth cracking has developed in the left lane and inside 4-foot shoulder. Guardrail will be replaced or rehabilitated, depending on condition, and terminal units will be replaced to meet current standards. Drainage rehabilitation includes resetting of grates, replacement of failed slope drains, and replacement of one failing headwall. Rock scaling is included to remove loose blocks and clear trees from the rock face and crest.

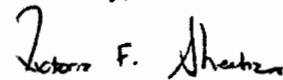

The contingency amount is proposed to be 3% and is recommended to account for variation in estimated quantities related to bridge deck and expansion joint repairs, guardrail and drainage rehabilitation, and rock scaling. In addition, traffic control for phased construction over a two season project and the potential for weather delays could result in additional costs.

The Contractor has been prequalified by this Department. The Contract has been approved by the Attorney General as to form and execution, and the Department has certified that the necessary funds are available and the bid reasonably conforms to the engineer's estimate in accordance with State procedure. Copies of the fully executed contract are on file at the Secretary of State's Office and the Department of Administrative Service's Office, and subsequent to Governor and Council approval will be on file at the Department of Transportation.

This project funding is 90% federal funds with 10% state match. Turnpike toll credit is being utilized for match requirements, effectively using 100% federal funds.

A copy of the Tabulation of Bids received for this project is attached along with the Contract Supplemental Sheet and a map indicating the location of the project.

Sincerely,

Victoria F. Sheehan
Commissioner

VFS/md

Department Estimate: \$9,972,615.50
Contract Amount: \$9,916,163.25
Under Estimate: \$ 56,452.25

SUPPLEMENTAL PROJECT INFORMATION SHEET

DESCRIPTION: The project consists of pavement and bridge rehabilitation along Interstate 93 from Mile 88.2 (2000' south of Exit 29) and extending northerly for 7.2 miles to Mile 95.4, (2000' north of Exit 30). Pavement work includes cold recycling of the left lane and shoulder, 4" deep, full width leveling course, and full width 1.5" overlay. Ramps at Exits 29 and 30 will receive a 2" inlay, full width. Incidental work includes rock scaling at 2 locations, guardrail repair / replacement, minor drainage rehabilitation, sign replacements, replacement of two sets of existing traffic study loops, and a 1" inlay, full width, on the mainline approaches (to eliminate traffic control markings). Bridge work includes replacement of expansion joints on 4 bridges (243/076 & 243/077 I-93 over US 3 and 202/064 & 203/064 I-93 over US3 and a Railroad; expansion joint, pavement, and membrane replacement on 2 bridges (173/064 & 173/066 I-93 over Merrill Rd); and replacement of plug joints on 2 bridges (201/034 & 202/034 I-93 over Mirror Lake Rd).

FEDERAL FUNDING: The Construction funding is 90% Federal Funding, with Turnpike Toll Credits anticipated for the State's 10% match.

CONTINGENCY: The Contingency amount is proposed to be 3% and is recommended to account for variation in estimated quantities related to bridge deck and expansion joint repairs, guardrail and drainage rehabilitation, and rock scaling. In addition, traffic control for phased construction over a two season project and the potential for weather delays could result in additional costs.

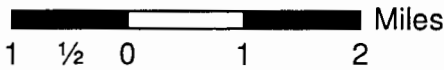

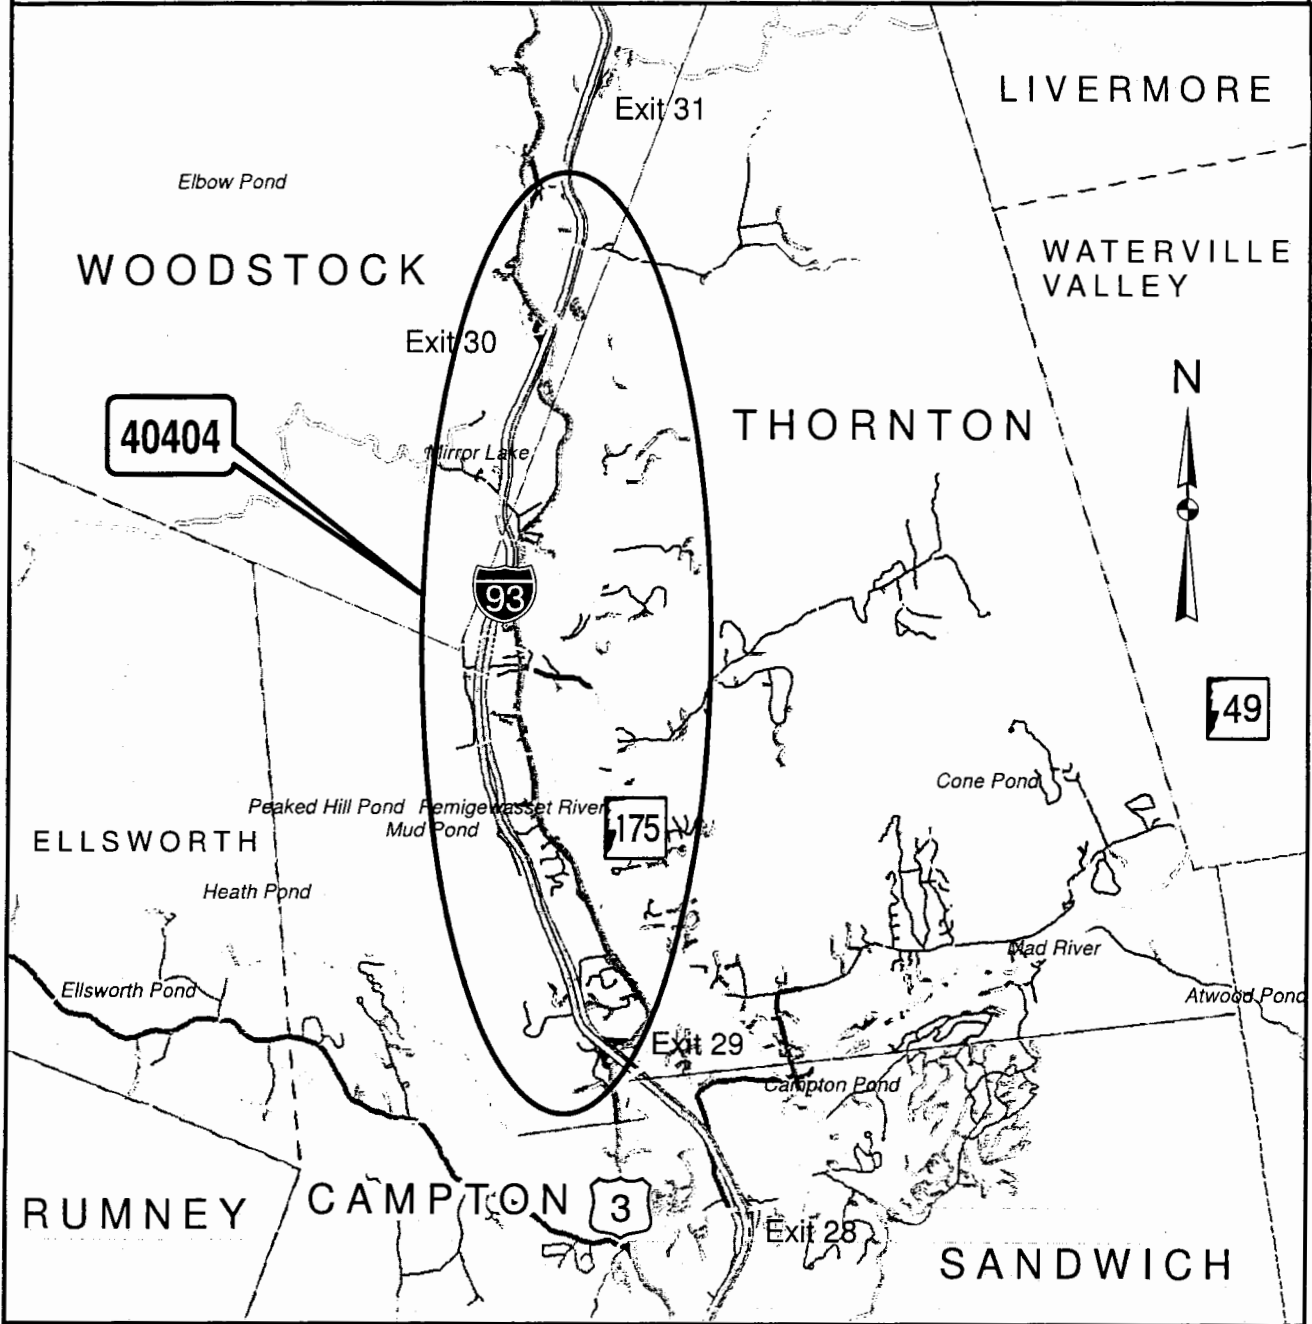

PROJECT INITIATED: State's Ten-Year Plan – under the IMPPP and BRRPI Programs.

PROJECT EXPLANATION: This segment of I-93 was reclaimed and paved with 6" of new pavement in 2002/2003. Crack sealant was applied in 2007, and a slurry seal preservation treatment of the travel lanes was completed in 2008. The slurry seal has reached the end of its service life, and pavement cores indicate that full depth cracking has developed in the left lane and inside 4-foot shoulder. Guardrail will be replaced or rehabilitated, depending on condition, and terminal units will be replaced to meet current standards. Drainage rehabilitation includes resetting of grates, replacement of failed slope drains, and replacement of one failing headwall. Rock scaling is included to remove loose blocks and clear trees from the rock face and crest.

TRAFFIC IMPLICATION: Bridge rehabilitation will require 2 phase construction with concrete barrier and durations of 4 – 6 weeks per phase. Due to the proximity to bridge construction, three ramps will need long term closures: Exit 29 SB On Ramp 4-6 weeks, Exit 30 NB On Ramp 4-6 weeks, and Exit 30 SB Off Ramp 8-12 weeks. Other ramps will need to be closed during work hours only for guardrail replacement, cold planing, and inlay. Frequent lane closures on the mainline will be required for cold planing, inlay, levelling, and overlay work. Shoulder closures will be required for guardrail, drainage, and rock scaling work. Rock scaling will require concrete barrier along the shoulder and closure of the adjacent lane during scaling. Ramp traffic may be maintained on cold planed surfaces for up to 4 weekdays. Speed reductions , from 70 mph to 60 mph, are proposed during work hours and for work zones with concrete barrier and overnight lane closures. Length of lane closures will be limited to 2.5 miles.
