EXPLANATION

This project is part of the State's Ten Year Transportation Improvement Plan. This project is located in the town of Alstead, NH and involves the replacement of Br. No. 073/163 that carries NH 123A over Warren Brook. This project is located approximately 0.1 miles north of the intersection of NH 123A and NH 124 in Alstead.

The existing bridge was damaged in the 2006 flooding in Alstead. This project removes the 1935 concrete "T" beam bridge from the red list. (Deck is rated as serious and the substructure rated as fair). Also the downstream head cut has reached the concrete stream scour slab and is now near the bottom of footing elevation which this project will remedy.

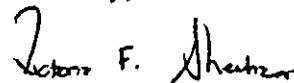

The contingency amount is proposed to be 5% based on the potential for difficulties encountered during pile driving operations.

The Contractor has been prequalified by this Department. The Contract has been approved by the Attorney General as to form and execution, and the Department has certified that the necessary funds are available and the bid reasonably conforms to the engineer's estimate in accordance with State procedure. Copies of the fully executed contract are on file at the Secretary of State's Office and the Department of Administrative Service's Office, and subsequent to Governor and Council approval will be on file at the Department of Transportation.

This project funding is 80% federal funds with 20% state match. Turnpike toll credit is being utilized for match requirements, effectively using 100% federal funds.

A copy of the Tabulation of Bids received for this project is attached along with the Contract Supplemental Sheet and a map indicating the location of the project.

Sincerely,

Victoria F. Sheehan
Commissioner
