The bioeconomy comprises the use renewable biological resources from land and sea – such as crops, forests, fish, animals and micro-organisms – to produce food, materials and energy. A new report by the U.S. Department of Agriculture shows that in 2014, the biobased products industry contributed \$393 billion and 4.2 million jobs to America's recovering economy. Dr. Murray McLaughlin, Executive Director, Bioindustrial Innovation Canada*

Governor Room G. States must decide how to respond to Food Safety Modernization Act

Now that the Food Safety Modernization Act is law and the FDA has released the regulations for it, states have to make the decision, to harmonize all, some or none of the FSMA rules into state regulations for food and feed. The answer will determine the funds the state receives from the FDA and how their companies work in the marketplace. On top of all of this is the implementation of the Veterinary Feed Directive Act. *Illinois Representative Norine Hammond, moderating, staffed by Tara Sad.*

How can states be involved? *Vermont Representative Carolyn Partridge, moderating, staffed by Mindy Bridges.*

*Seth Barnes, Oregon Forest & Industries Council
Lindsey Shute, Executive Director, National Young Farmers Coalition*

*Tony Troups, Advantage Capital Partners
Tammy Hornbeck, Communities Unlimited*

Louisiana Room L. How can trade support rural communities?
