This session will feature presentations from the CEO of a fast-growing LED lighting business that prospered by moving its manufacturing operations from China to Pennsylvania, and from public and private sector proponents of super-efficient “passive house” buildings and deep retrofits that are creating dramatic energy cost savings in commercial, residential, and affordable housing.

However, military spouses and families are often disproportionately affected by the requirements and variances of occupational licensing. How can the states of the ERC work to relieve these workforce issues for our military veterans?

Creating Cultures of Health

The conditions where people live, learn, work, and play — the social determinants of health — can affect their health and well-being. By working to build a "culture of health," two of our region's communities are taking a multifaceted approach to addressing all the factors that support better health and will share their stories about how they built the foundations of healthier communities.
