Dept. Environmental Services, In-Lieu Wetland Mitigation, Grants – Non - Federal

EXPLANATION

New Hampshire RSA 482-A:3 requires a wetland permit for any proposed project that involves dredging or filling of a wetland. Before a wetland permit is issued, applicants must show that the proposed project will avoid adverse impacts to wetlands and will minimize and provide compensation for those wetland impacts which are unavoidable.

The DES wetlands program adopted a set of mitigation rules that establish what is necessary for an applicant to provide for wetland compensation. The current department rules spell out ratios for wetland compensation that include creating a new wetland, restoring a former wetland site, or protecting a high-quality aquatic resource by preserving adjacent upland habitat. The newest improvement, begun in 2006, to the mitigation options is commonly referred to as an *in-lieu fee program*. This mitigation option is ideal for projects that have difficulty in locating an appropriate mitigation site. The Aquatic Resource Mitigation Fund (ARM) authorizes the collection of mitigation funds in lieu of other forms of wetland mitigation as part of a Wetlands Permit Application.

The Department issued the request for proposals for ARM Funds available in the Pemigewasset – Winnepesaukee River watershed in April, 2016. The TPL application was received and on November 28, 2016, DES announced the decision to fund the TPL project in the Pemigewasset – Winnepesaukee River watershed. The project proposed by the TPL was recommended for funding by the ARM Fund Site Selection Committee. Attachment A lists the proposals received and Committee members involved in the decision. The review of the awards by the Army Corps of Engineers and the New Hampshire Wetland Council resulted in full support of the recommendations.

His Excellency, Governor Christopher T. Sununu
and the Honorable Council

Page 2

The project is to permanently conserve approximately 198 acres of land in the Town of Meredith. The proposed acquisition includes areas of prime wetlands, 330 linear feet of Page Brook and 2,875 linear feet of an unnamed brook that flows directly into Lake Winnepesaukee. This project builds connectivity across Meredith Neck to create a large block of conserved land. Attachment B includes a map of the property.

In the event that other funds no longer become available, general funds will not be requested to support this program. This agreement has been approved as to form, content, and execution by the Attorney General's Office.

We respectfully request your approval.
